

Some text

Lighting is more than illumination.

It defines architecture, enhances mood, improves productivity and transforms everyday spaces into experiences.

Whether it is a commercial project, an industrial facility or a modern home, the right lighting design plays a crucial role in creating the perfect environment.

Clove Lighting combines design brilliance with engineering precision to create lighting solutions that elevate every space.

Introducing

Design Brilliance

Lighting that complements architecture.

Engineering Precision

Technically advanced lighting systems.

Customization Capability

Solutions designed around your project.

Energy Efficiency

Smart and sustainable lighting technologies.

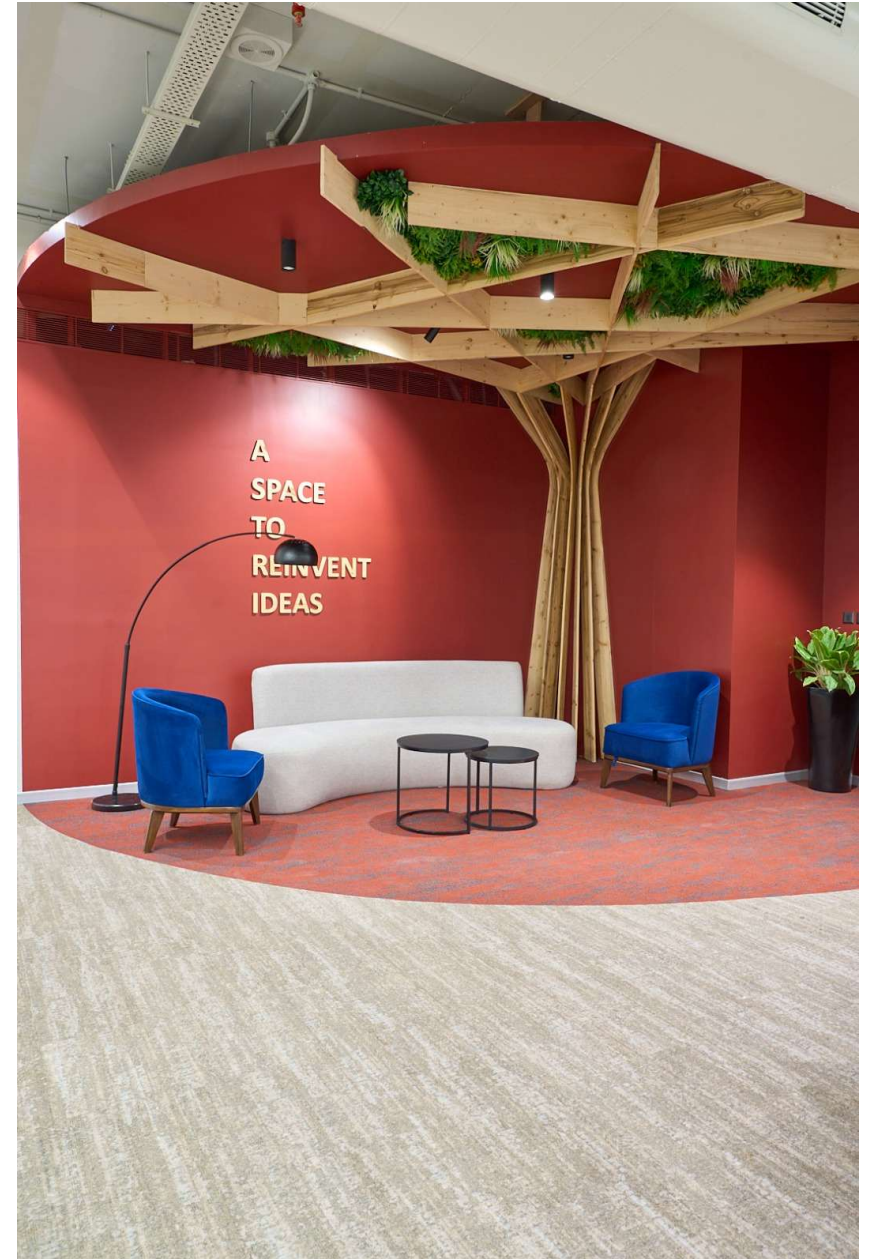

Reliable Manufacturing

Consistent quality with scalable production.

Introducing

At Clove Lighting, we combine design thinking, engineering excellence, and manufacturing capability to create lighting solutions tailored for modern spaces.

Clove Lighting Today

Illuminating Modern Offices with Innovative Lighting Solutions

20+ Years of
Manufacturing Experience

Manufacturing units across
3 locations

Offices across **7+ locations**

300+ Employees

availability
of spaces.

Core Philosophy

Design

Enhancing architectural aesthetics

Performance

Energy Efficiency,
Delivering reliable lighting
output

Experience

Pre sales, Design ,Mock
up, After sales ,
installation guidance

Flexibility

Customization, shape, form,
color as per project

Sustainability

Supporting environmentally
responsible design

Milestones

2009

Company established with focus on tool room and automotive seating components manufacturing.

2014

Entered lighting industry by manufacturing CFL indoor lighting fixtures for major brands.

2017

Installed pressure die casting facility (60T–650T) and launched Clove Lighting brand.

2019

Delivered 2 lakh sq. ft. lighting projects in Pune & Mumbai, marking strong market entry.

2021

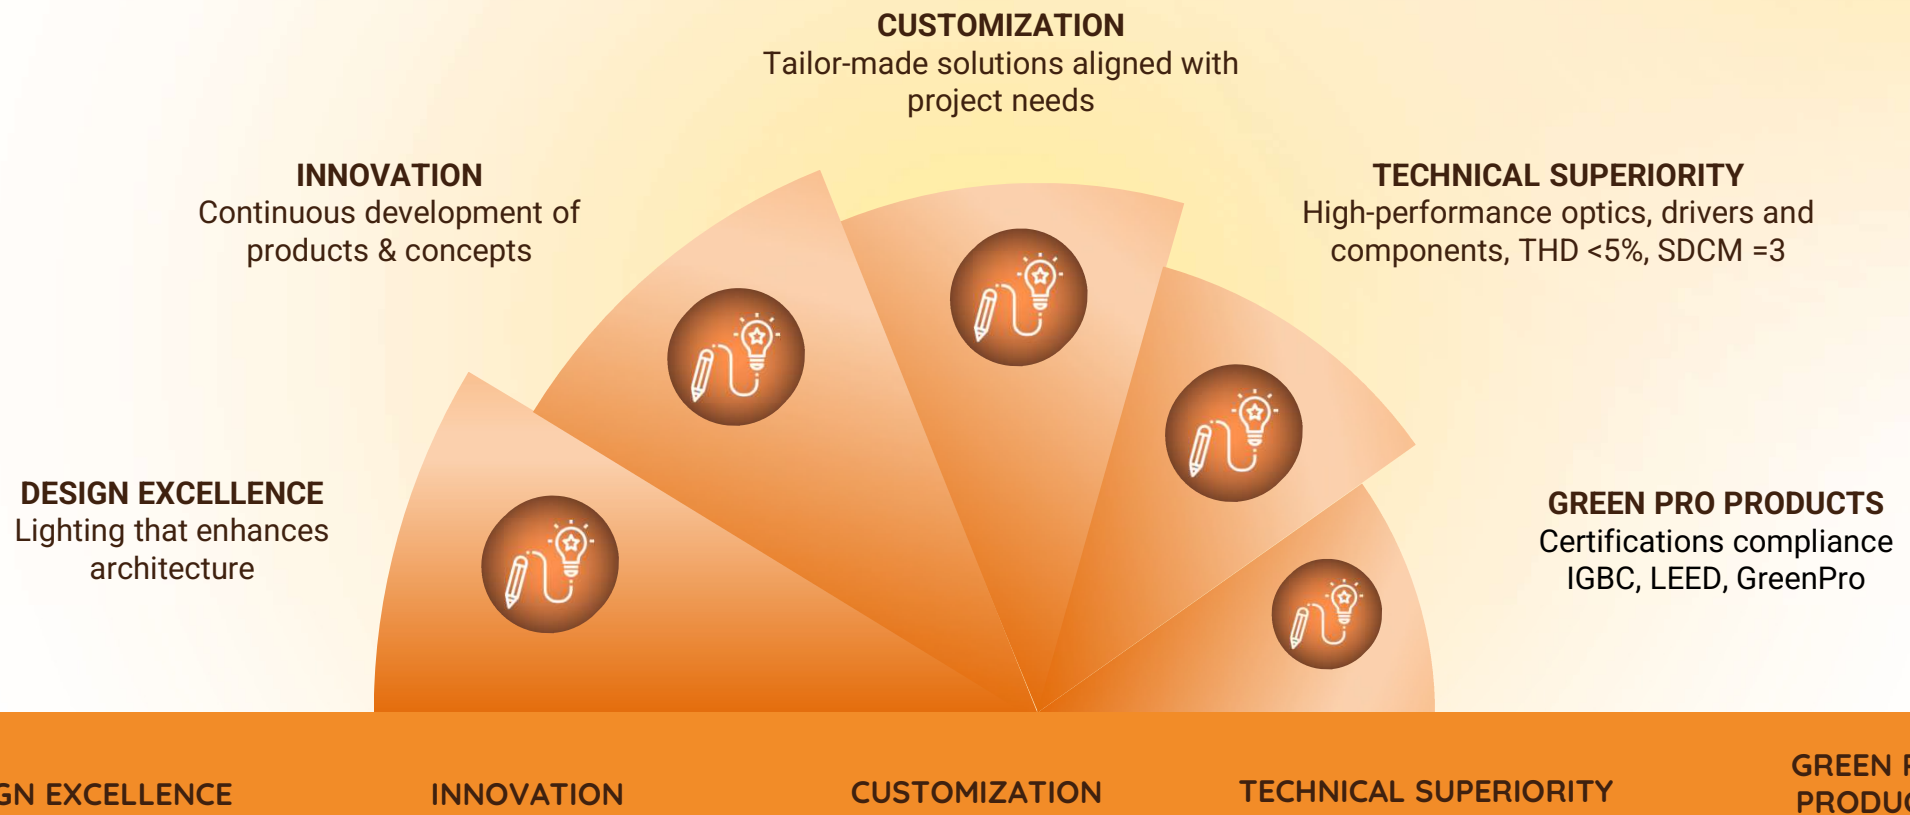

Started commercial LED lighting manufacturing and in-house COB downlighter development.

Legacy Phase

Expanded R&D and manufacturing capabilities including drivers, BMS and SMPS production.

USP's

DESIGN EXCELLENCE

INNOVATION

CUSTOMIZATION

TECHNICAL SUPERIORITY

GREEN PRODUCTS

Our collaborative process ensures lighting solutions that integrate seamlessly with the **overall design vision**.

GREEN PRODUCTS

Design Thinking Process:

Right from the inception of the idea to design, production, testing, assembling, packaging, installation and after sales support.

Minimalistic & High-Precision Design:

Sleek, screw-less designs with best-in-class fit and finish with Zero light leakage for a seamless lighting experience.

Highly Customization & Versatility:

Highly customizable solutions tailored to specific needs

Superior Efficiency:

Delivers up to 125 Lumens/Watt for Linear and Downlight Series

Genuine and Branded Quality Parts:

Constructed with high-quality branded genuine parts which are thoroughly tested for performance, safety, installation, service, and packaging.

Our products are engineered for **performance, reliability and efficiency.**

Engineering Excellence

Expansive & Strategic Multilocation Manufacturing Facilities:

50,000 sq. ft. advanced production units in Pune and Hyderabad.

Certified Quality Standards:

ISO 9001:2000 certified manufacturing setup ensuring precision and consistency.

End-to-End In-House Production:

From design conceptualization to installation, ensuring seamless execution.

Advanced Inhouse R&D & Testing:

Dedicated in-house research, innovation, and quality assurance departments.

Cutting-Edge Technology:

State-of-the-art manufacturing infrastructure for superior efficiency and output.

Customization Capabilities:

Expertise in delivering highly customized solutions tailored to unique requirements.

Premium Quality Raw Material & Parts:

Use of high-quality, branded, and genuine parts for durability and performance.
